

Multi-Currency Processing

Accept Online Payments in any of Nearly 100 Currencies

An Essential Solution for Growing Business

Consumers are increasingly using the global reach and convenience of the Internet to make purchases. For businesses with an e-commerce presence, the ability to market and accept payments in customers' local currencies can provide a sizable competitive advantage.

Attract International Customers & Grow Your Revenue

Multi-currency processing from Elavon provides you with an easy, affordable way to attract international customers by accepting payment for products and services in nearly 100 currencies through a single Merchant ID.

The behind-the-scenes process is simple and does not interrupt any existing payment acceptance processes you have in place. All you have to do is determine which currencies you wish to sell your products in and then enhance your web sites to market to international clientele. You may choose to have multiple country web sites, each accepting payments in the local currency, or choose a single web site and offer shoppers a choice of payment currencies.

Elavon handles the rest for you. Settlement and funding—net of exchange rates—are provided in your domestic currency. Elavon handles all aspects of currency exchange management, giving you one simple, cost-effective solution matched to your needs. Interchange rates and fees remain constant regardless of the currencies you choose to accept.

Elavon's Multi-currency solution works with all Visa® and MasterCard® cards and supports card-not-present environments including e-commerce, mail order and phone order.

Benefits at a Glance:

1 Expanded Global Reach

Provides online businesses an easy and affordable solution to grow revenue by marketing to international clientele and expanding into new geographies.

2 Streamlines Business Financials

Eliminates the costs and complexities of managing multiple business entities and banking relationships in every country where you have an e-commerce presence.

3 Improved Customer Experience

Presents shoppers with purchase amounts in their own currencies, helping to eliminate confusion while minimizing chargebacks.

4 Simplified Implementation

Gets your business up and running quickly by using Elavon's InternetSecure e-commerce gateway.

5 Consolidated reporting

Provides online access to statements and reports using MerchantConnect.
